MITSUBISHI MOTOR SALES OF AMERICA, Inc.

TECHNICAL SERVICE BULLETIN

SUBJECT: **MANUAL TRANSMISSION/TRANSAXLE GEAR OIL**	NO. TSB-93-22-001
	DATE April, 1993
	MODEL All

PURPOSE

The manual transmissions/transaxles in Mitsubishi Motors vehicles require the use of API GL4 classification gear oil. Using an incorrect API classification gear oil may affect the shift effort and may cause transmission/transaxle component damage.

Use only gear oils having the API Classification GL4.

Mitsubishi Diamond Gear Lube – A991ZC2X01 – SAE 75W - 85W GL4, meets this requirement.

CAUTION: Do not use gear oils having an API GL5 classification. GL5 oils have additives which may chemically react with sintered copper synchronizer rings leading to manual transmission/transaxle damage.
